

Assignment-8

Ionic framework

Assignment: Develop a Mobile application using Ionic Framework and write at least three Unit test cases using Jasmine. An Ionic app is initiated using the command: `ionic start ConversionApp tabs`.

A new user has to register to use the application and old users can manage all the profile by direct option provided.

We can delete the account by entering the credentials.

Part-2

Login page :

A screenshot of a web browser displaying a login page. The browser's title bar shows 'currency converter'. The page has a blue header with the text 'currency converter'. Below the header, there are two input fields: 'Username' and 'Password'. A blue button labeled 'Sign-In' is positioned below the password field. A link labeled 'Forgot password' is located below the 'Sign-In' button.

Calculation page:

A screenshot of a web browser displaying a calculation page. The browser's title bar shows 'Home'. The address bar shows the URL '127.0.0.1:51049/ase2/www/index.html#/tab/home'. The page has a blue header with the text 'Home'. Below the header, there are two input fields: 'Dollar' and 'Euro'. A blue button labeled 'Calculate' is positioned below the 'Euro' field.

Data retrieval from local server:

This XML file does not appear to have any style information associated with it. The document tree is shown below.

```
▼ <DollarToEuro>
  <Dollar>1.0</Dollar>
  <output>Output: Dollar To Euro 0.92</output>
</DollarToEuro>
```
